Test - 2] Topic - condition and loops.

1) print table of 5 using for loop.

num = 5

for i in range(1, 11):

print(num, "x", "=", num * i)

(1)

2) print table of 10 using while loop.

num = 10

while i <= 10:

print("10 x", i, "=", 10 * i)

start i = 1

(1)

15) is the else statement compulsory?

→ No - else statement is not compulsory
an if statement without else

2) print table of 10 using while loop

num = 10

start = 1

end = 11

while i <= 10:

print(i)

start i = 1

X

3) print count down from 10 to 1 using while loop

i = 10

while i >= 1:

print(i)

i -= 1

(1)

$x = \text{"Hello world"} -$
List $\rightarrow x.reverse() - X$

total without X
with X
PAGE No.
DATE: / /

$x[0:-1]$

1) find the sum of digits of a number from 1-10
for i in range(1, 11):

num = 1

s = 0

while num > 0:

s = s + (num % 10)

num = num // 10
print(i, "-", s, ", s)

20) what are the arguments of range() function?

→ range

1) stop

2) start ✓

3)

4) end ✓

5) skip. ✓

①

13) what is a while loop in python

①

while loop — while loop is a block of code

repeatedly as long as a given condition is true.

12)

13) what are the loops in python

Two loops

① for loop ✓

2) while loop. ✓

①

11) what is the syntax of if-elif-else statement

if condition1:

elif condition2:

elif condition3:

elif condition4:

else:

if condition1:

code block

elif condition2:

code block

elif

else:

12) can an if statement exists without an else statement.

→ yes - an if statement can exist without an else statement.

13) can there be multiple elif statement in one block

→ yes - multiple single if block to check multiple condition one after another.

14) can there be multiple if statement in one block

yes -

can be multiple if statement in one block.
each if statement condition is True, its block
be executed

7) count the number of vowels + consonants in a given string like: "Python is a programming language"

→ `s1 = "Python is a programming language"`

→ `vowels = 0`

→ `consonants = 0`

`for ch in s1.lower():`

`if ch.isalpha():`

`if ch in "aeiou":`

`vowels += 1`

`else:`

`consonant += 1`

`print("Vowels:", vowels)`

`print("Consonants:", consonant)`

10) difference write what is the difference between if and elif?

if - use to start a conditional statement.

elif - after if to check another condition

①

5) find the maximum sum of digits from 1-10 of even numbers.

sum = 0

for i in range(2, 11, 2):

sum = sum + i

print('sum:', sum)

①

6) find the maximum of a list like: [78, -5, 10, -20, 99] using while loop

list1 = [78, -5, 10, -20, 99]

m = list1[0]

i = 0

while i < len(list1):

if list1[i] > m:

m = list1[i]

i = i + 1

print(m)

①

9) Display common elements from the two list using while loop

a = [10, 20, 20, 30, 40]

b = [10, 20, 20, 50, 70, 90]

i = 0

while i < len(a):

if a[i] in b:

print(a[i])

i = i + 1

①
