Q. 13] what is Dictionary.

→ Dictionary is a collection of key:Value pairs.

①

Q. 1] Reverse a string without slicing:

→

"Hello World"

S₁ = "Hello World"
print(S₁)

X

Q. 3] Remove duplicate character:

→

"carrot"

S₂ = "carrot"print(S₂)S₂ = S.duplicate()print(S₂)

X

Q. 4] what is difference between lists and sets

listsets① OrderedUnordered② Duplicate allowedNo Duplicate③ IndexedNo Indexed

①

X

discard

5

5) Symmetric Difference

5) Comparison / Relation operator :- $\{=, <, >, <=, >=, \neq\}$

14) How many methods to create dictionary?

→ Method 1: Using {}

Method 2: Using dict()

Method 3: empty dict dictionary

(1)

15) Different How many methods to access value in dictionary?

(i) using key

(ii) using get method

(1)

16) How many methods to delete element in dictionary?

→

X

17) How to sort element in list slicing method?

[5, 11, 14, 7, 9, 3, 2, 5, 9]

list = [5, 11, 14, 7, 8, 3, 2, 5, 9]

print: list[]

X

20) Difference between sets and dictionary?

Sets

①

[]

②

faster

dictionary

{ }

slower

(1)

18) what is ~~packing~~ variable in tuple? explain using example.

→ Tuple is storing multiple values

~~Student = ("Ram", 20, "engineer")~~

~~print~~

~~Student = ("Ram", 20, "python")~~

~~print(Student)~~

Name, age, Course = student

print(Name)

print(age)

print(Course)

unpacking
→ wrong unpacking

19) what is unpacking variable in tuple? explain eg.

→ unpacking -

a = 10

b = 20

c = 30

print(a, b, c)

a = (1, 2, 3)

b =

c =

d =

b, c, d = a
print(b)
print(c)
print(d)

2) How many method to insert element in list

1) append()

2) insert()

3) extend()

①
