

16) difference write what is the difference between if and elif:

if - use to start a conditional statement.

elif - after if to check another condition.

5) find the maximum sum of digits from 1-10 of even numbers.

→ s = sum = 0

for i in range(2, 11, 2):

sum = sum + i

print('sum:', sum)

6) find the maximum of a list like: [78, -5, 10, -20, 99] using while loop

→ list1 = [78, -5, 10, -20, 99]

m = list1[0]

i = 0

while i < len(list1):

if list1[i] > m:

m = list1[i]

i = i + 1

print(m)

7) Display common elements from the two list using while loop

a = [10, 20, 20, 30, 40]

b = [10, 20, 20, 50, 80, 90]

i = 0

while i < len(a):

if a[i] in b:

print(a[i])

i = i + 1
